Carbon Credit Conference

9:00am - 4:00pm, September 28, 2007
Texas A&M University
Ag Research & Extension Center
Overton, Texas

What is it About:

In addition to traditional agricultural, range, and forest products, landowners may now potentially realize income from the sale of carbon credits. But what does it mean? Is it a good deal? And does it truly provide an opportunity to generate additional income? This conference will help landowners, foresters, farmers and others gain a strong understand of the carbon market, how it works, and if they might benefit from carbon credits.

Agenda:

- 8:00 **Registration**
- 8:50 **Welcome & Opening Remarks by the Moderator**
Craig McKinley – Extension Specialist, Oklahoma State University
- 9:00 **How Carbon Markets and Other Ecosystem Services May Benefit Landowners**
