

# Classic References For Georgia Pines (*Pinus*)

Dr. Kim D. Coder, Warnell School of Forestry & Natural Resource, UGA December 2006

---

The references listed below are the foundation for information on the native pines of Georgia. Other maps and references are available but those listed here are the sources for many other references. Some of the oldest works on native pines are not cited because they are represented by newer texts and because some species definitions have been changed. In any study of the genus *Pinus* native to Georgia, the following books will be of great value.
