Chopper, Chopper Gen2, Polaris SP, and Etrigra E-Pro2 active ingredient is 22.6% Imazapyr (soil and foliar active, good preplant exotic grass control; Bermuda and bahia, do not spray within 2-3 drip lines of field edges with valuable hardwoods), Razor Pro, Honcho, and Credit Extra active ingredient is Glyphosate (foliar active only, good for direct spraying around field edges, under drip line to avoid killing desirable hardwood trees), Timberland 90 is a common non-ionic surfactant used with water based herbicides like glyphosate that do not have a built in surfactant. Methylated seed oil (MSO) is often used with oil-based herbicides like Chopper, Polaris SP, Etrigra E-Pro2EC (@ 1-5 qts/ac) to improve performance on tough to control species.
